

BY FRED CATEL, 9DTK.

The M. R. A. C. bowling team flew to Madison last Monday and beat the Madison amateurs two out of three games. The first game was lost by the M. R. A. C. team probably because they were still groggy from their airplane ride. The scores were as follows:

Madison	....	754	MRAC	.....	679
Madison	....	666	MRAC	.....	784
Madison	....	729	MRAC	.....	739
Totals			....	2,149	2,202

This interesting report comes from 9ASL: "As a former member of the code class I will give you some idea what I have done so far. This station went on the air Oct. 9, 1927, and has been in communication with 312 stations. I have worked 33 states, the District of Columbia and Canada. The MRAC deserves a great deal of credit for the results of this station. I am using a 210 tube and chemical rectifier, but expect to put in kenotrons and a decent filter sys-

tem." (Signed) D. E. Wetherell, Milwaukee.

9ASL did not know what an amateur set meant when he first joined the club, but by regular attendance to meetings and the code class he has become a real op.

Operators Marvin Whitton, MF, and Urban Weiler, UW, of 9EBO, Burlington, recent visitors at 9DLD, Jefferson, had an auto accident on their return trip just a few blocks from home. MF has returned to his home in Whitewater and will be off the air for about a week. The accident happened when UW missed a turn in the road just before reaching Whitewater. The car turned over three times and was completely wrecked. No bones were broken but both men were bruised and shaken up. 9DLD says, "Don't let this keep any of the gang from visiting me."
